

GCSE MARKING SCHEME

SUMMER 2023

**GCSE
SCIENCE (DOUBLE AWARD) – UNIT 2**

3430U20-1 AND 3430UB0-1

INTRODUCTION

This marking scheme was used by WJEC for the 2023 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

GCSE SCIENCE (DOUBLE AWARD) UNIT 2 – CHEMISTRY 1

SUMMER 2023 MARK SCHEME

GENERAL INSTRUCTIONS

Marking rules

All work should be seen to have been marked.

Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.

Crossed out responses not replaced should be marked.

Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.

Extended response question

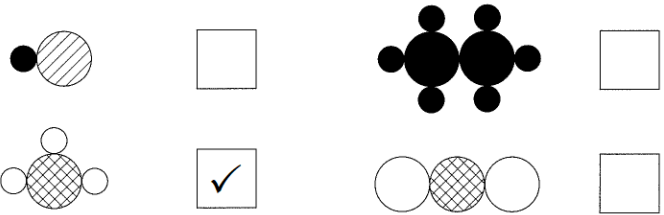

A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statements.

Marking abbreviations

The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.

cao	=	correct answer only
ecf	=	error carried forward
bod	=	benefit of doubt

FOUNDATION TIER ONLY QUESTIONS

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
1	(a)	(i)		hydrogen bromide accept HBr		1		1		
		(ii)		carbon and hydrogen both needed, either order		1		1		
		(iii)		3		1		1		
		(iv)				1		1		
	(b)			H ₂ CO ₂ accept correct number of atoms in any order		1		1		
	(c)	(i)		Li ⁺ and Cl ⁻ both needed		1		1		
		(ii)		MgBr ₂		1		1		

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
		(iii)		$2\text{Ca} + \text{O}_2 \longrightarrow 2\text{CaO}$ <input checked="" type="checkbox"/> $\text{Ca} + \text{O}_2 \longrightarrow 2\text{CaO}$ <input type="checkbox"/> $\text{Ca} + \text{O} \longrightarrow \text{CaO}$ <input type="checkbox"/>		1		1		
				Question 1 total	0	8	0	8	0	0

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
2	(a)	(i)	I	D	1			1		
			II	B E F award (1) for each correct letter – any order	3			3		
		(ii)		convection	1			1		
	(b)	(i)		14.8			1	1	1	
		(ii)		carbon dioxide neutral answers – methane / greenhouse gas	1			1		
		(iii)		award (1) each for up to two of following climate change (more) extreme weather (more) drought conditions (more) flooding forest fires snowier winters slowing of gulf stream leading to colder weather in UK/ northern Europe polar ice caps melting (at a faster rate) sea levels rising crop failure different pests affecting farmland loss of wildlife habitat	2			2

					AO1	AO2	AO3	Total	Maths	Prac
		(ii)		72 (2) if answer incorrect award (1) for any of following $\begin{array}{r} 3.13 \\ 4.35 \\ \hline 6260 \\ 87 \end{array}$ 71.9		2		2	2	
				Question 3 total	0	8	1	9	8	5

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
4	(a)	(i)		24		1		1	1	1
		(ii)		accept any value in the range 4.7-5.0			1	1	1	1
		(iii)		1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/>			1	1		1
		(iv)		0.25 (2) if answer incorrect award (1) for either of following indication of time of 30s indication of calculation using 0.5 i.e. $\frac{7.5}{0.5} / 15$			2	2	2	
	(b)	(i)		B	1			1		1
		(ii)		more (1) a greater (1)	2			2		
				Question 4 total	3	1	4	8	4	4

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
5				<p>Indicative content</p> <p>use large trough of water small piece of metal tongs safety glasses safety screen</p> <p>lithium - least reactive – floats, moves slowly and only produces a small amount bubbles sodium - floats, melts into a ball, moves quickly and produces more bubbles potassium - most reactive – floats, moves very quickly, burns with a lilac flame and produces a large amount of bubbles</p> <p>5-6 marks Good safety precautions; good description of observations with some specific detail; clear indication of order of reactivity <i>There is a sustained line of reasoning which is coherent, relevant, substantiated and logically structured. The candidate uses appropriate scientific terminology and accurate spelling, punctuation and grammar.</i></p> <p>3-4 marks One safety precaution; basic description of general observations for Group 1 metals; some reference to order of reactivity <i>There is a line of reasoning which is partially coherent, largely relevant, supported by some evidence and with some structure. The candidate uses mainly appropriate scientific terminology and some accurate spelling, punctuation and grammar.</i></p>	6			6		6

Question				Marking details	Marks available					
					AO1	AO2	AO3	Total	Maths	Prac
				1-2 marks Basic reference to safety; some relevant observations <i>There is a basic line of reasoning which is not coherent, largely irrelevant, supported by limited evidence and with very little structure. The candidate uses limited scientific terminology and inaccuracies in spelling, punctuation and grammar.</i> 0 marks No attempt made or no response worthy of credit.						
				Question 5 total	6	0	0	6	0	6

Question				Marking details		Marks available					
						AO1	AO2	AO3	Total	Maths	Prac
6	(a)			London, Yorkshire and the North West all have a mean DMFT of 1.0				2	2		
				The South East has the lowest mean DMFT	✓						
				East Midlands has the highest mean DMFT							
				East England, the South West and the South East have a mean DMFT of 0.7							
				The East Midlands has a lower mean DMFT than Yorkshire	✓						
				London, the North West and South West all have a mean DMFT of 0.9							
	(b)	(i)		All areas with fluoridated drinking water have lower mean DMFT than areas which do not fluoridate water				1	1		
				All areas with fluoridated drinking water have the same mean DMFT as non-fluoridated areas							
				All areas with fluoridated drinking water have lower mean DMFT than the North West	✓						
		(ii)		It is not possible to decide whether fluoridation of drinking water lowers mean DMFT	✓			1	1		
				All areas with fluoridated drinking water have higher mean DMFT than areas which do not fluoridate drinking water							
				All areas with fluoridated drinking water have a higher mean DMFT than the South West							

Question				Marking details	Marks available
