

**GCSE (9-1)**

**Combined Science B (Twenty First Century)**

Unit **J260/04**: Combined Science

General Certificate of Secondary Education

**Mark Scheme for June 2018**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2018

Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

<b>Annotation</b>	<b>Meaning</b>
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

**Subject-specific Marking Instructions****INTRODUCTION**

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

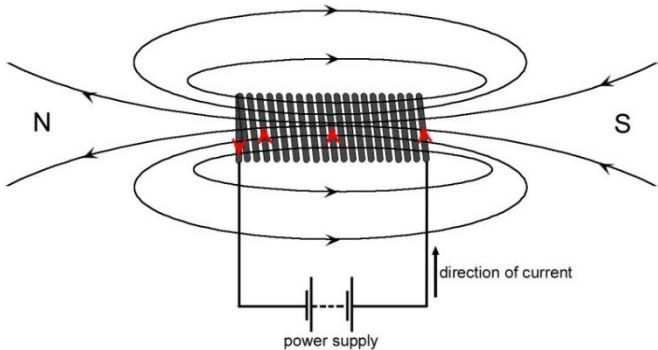

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives for GCSE (9-1) in Combined Science B:

	<b>Assessment Objective</b>
<b>AO1</b>	<b>Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.</b>
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
<b>AO2</b>	<b>Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.</b>
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
<b>AO3</b>	<b>Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.</b>
<b>AO3.1</b>	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
<b>AO3.2</b>	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
<b>AO3.3</b>	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

Question		Answer	Marks	AO element	Guidance
1	(a)	Wear eye protection ✓	1	2.2	<b>ALLOW</b> goggles/ <b>safety</b> glasses/gloves/ <u>lab</u> coat/apron/(face) mask <b>IGNORE</b> PPE
	(b)	(i) D ✓	1	1.2	
		(ii) Indicator ✓	1	1.2	<b>ALLOW</b> any named indicator, including Universal Indicator
	(c)	(i) NaCl ✓ CO <sub>2</sub> ✓	2	2 x 2.2	<b>DO NOT ALLOW</b> incorrect letter cases. Order of atomic symbols unimportant e.g. ClNa, O <sub>2</sub> C <b>ALLOW</b> superscript instead of subscript e.g. CO <sup>2</sup> <b>ALLOW</b> CO2 <b>IGNORE</b> incorrect balancing
		(ii) Sodium carbonate is neutralised during the reaction HCl ✓	1	2.1	
	(d)	Crystallisation ✓	1	1.2	
	(e)	Distillation ✓	1	1.2	
	(f)	(i) Increase in salt/sodium increases the deaths (from cancer) ✓	1	3.1a	<b>ALLOW</b> positive correlation
		(ii) The death rate in South Korea is higher than expected from the trend ✓	1	3.2b	
	(g)	<b>Any two from:</b> Idea of growing/culturing the bacteria (on Petri dishes/agar) ✓  (Grow <i>Helicobacter</i> in) different concentrations/levels/amounts of salt ✓  Measure / compare the growth ✓	2	2 x 2.2	<b>ALLOW</b> fermentation to grow bacteria  <b>ALLOW</b> calculate growth

Question			Answer	Marks	AO element	Guidance								
2	(a)	(i)	wire wound/coiled ✓	1	1.2	<b>ALLOW</b> make a coil of <b>wire</b> .								
		(ii)	Direction of current flow through solenoid ✓  Magnetic field, including arrows, around solenoid ✓  Poles of the magnetic field ✓  	3	2.2  3.1a  2.2	Arrow(s) positioned correctly on any part of the solenoid. <b>ALLOW</b> arrow above/below/in the solenoid to indicate that the current flows to the left  <b>IGNORE</b> the spacing of magnetic field lines. Minimum of one line above and one line below the solenoid								
	(b)	(i)	Points plotted correctly ✓  Single continuous straight line of best fit drawn correctly through plotted points ✓	2	2 x 2.2	<table border="1"> <thead> <tr> <th>Number of turns</th> <th>Number of paper clips</th> </tr> </thead> <tbody> <tr> <td>40</td> <td>19</td> </tr> <tr> <td>50</td> <td>25</td> </tr> <tr> <td>60</td> <td>31</td> </tr> </tbody> </table>	Number of turns	Number of paper clips	40	19	50	25	60	31
Number of turns	Number of paper clips													
40	19													
50	25													
60	31													
		(ii)	Increase in number of turns increases strength of magnetic field/number of paperclips lifted ✓  Trend is linear ✓	2	3 x 3.1a	<b>ALLOW</b> positive correlation  <b>ALLOW</b> proportional/approximate doubling idea/similar amount each time/constant rate/straight line								

Question		Answer	Marks	AO element	Guidance
	(iii)	<p><b>Any one from:</b> Increase current/voltage ✓</p> <p>Plausible answers related to changing the metal / use metal/ alloy with increased magnetic permeability or wtte ✓</p>	1	1.2	<p><b>DO NOT ALLOW</b> more turns in coil <b>IGNORE</b> power/power supply/ battery</p> <p><b>IGNORE</b> larger/stronger core</p>
	(c)	Electromagnets are not permanent magnets ✓	1	2.1	

Question		Answer	Marks	AO element	Guidance	
3	(a)	<p><b>Any one from:</b> Monitor / measure the volume of carbon dioxide produced / decrease in mass owing to loss of carbon dioxide/ rate of carbon dioxide production ✓</p> <p>Monitor / measure the loss of glucose / rate of glucose loss ✓</p>	1	2.2	<p><b>ALLOW</b> count number of bubbles</p> <p><b>ALLOW</b> measure the amount of glucose</p>	
	(b)	(i)	48 (cm <sup>3</sup> ) ✓	1	3.1a	
		(ii)	<p><b>FIRST CHECK THE ANSWER ON ANSWER LINE</b> <b>If answer = 0.4 (cm<sup>3</sup> / h) award 3 marks</b></p> <p>Rate of ethanol production = vol. of ethanol produced (cm<sup>3</sup>) ÷ time taken (h) ✓</p> <p>= 48 ÷ 120 ✓</p> <p>= 0.4 (cm<sup>3</sup> / h) ✓</p>	3	1.2 2 x 2.2	<b>ALLOW</b> ECF from (b)(i) for all 3 marks
	(c)	(i)	3.5 (°C) to 44 (°C) ✓	1	3.1a	<b>ALLOW</b> 3.25-3.75 °C to 43.75-44.25 °C inclusive <b>ALLOW</b> numbers reversed
		(ii)	32.3 (°C) ✓	1	3.1a	<b>ALLOW</b> 32.0-33.0 °C inclusive
		(iii)	<p>Measure the reaction rate at smaller temperature intervals ✓</p> <p>Carry out the experiment again between 30 ° C and 35 ° C ✓</p>	2	2 x 3.3b	
	(d)	<p>(Idea of finding) mass <b>and</b> volume ✓</p> <p>mass ÷ volume ✓</p>	2	2 x 1.2	<b>DO NOT ALLOW</b> weight	

Question			Answer	Marks	AO element	Guidance
4	(a)	(i)	One student to release, one to catch / necessary for catcher not to know when ruler released/dropped, owtte ✓	1	2.2	
		(ii)	<p><b>Any three from:</b></p> <p>Same (size/length) ruler ✓</p> <p>Same people/roles ✓</p> <p>Same (catching) hand ✓</p> <p>Same catching position ✓</p> <p>Same measuring point ✓</p> <p>Same release point/position ✓</p> <p>Dropped, not thrown/pushed down ✓</p> <p>Same influence/lack of influence of stimulants e.g. caffeine ✓</p> <p>Same place/environment or light level ✓</p> <p>Same time of day ✓</p> <p>No practice ✓</p>	3	3 × 2.2	<b>IGNORE</b> just same distance
		(iii)	<p><b>Any one from:</b></p> <p>Measurement to be made at same point on catcher's hand ✓</p> <p>Answers relating to eyeline / parallax ✓</p>	1	2.2	<b>ALLOW</b> measure from same fingers/do it from the same place

Question		Answer	Marks	AO element	Guidance
	(b) (i)	<b>FIRST CHECK ANSWER ON ANSWER LINE</b> If answer = 110 (mm) award 2 marks = 110.1 ✓ = 110 (mm) (3 sig. figs) ✓	2	2 x 2.2	
	(ii)	109 (mm) ✓	1	3.1a	
	(c) (i)	eye → sensory neuron → brain → spinal cord → motor neuron → muscle (3rd box) ✓	1	2.1	
	(ii)	Across gaps called synapses ✓	1	1.1	
	(d) (i)	<b>Any one from:</b> Same colour ✓  Ensure that they tasted the same / disguise (differences in) taste ✓	1	3.2a	<b>ALLOW</b> so they didn't know which drink they had/which group they were in/could not tell the difference/it was a blind test
	(ii)	so volume does not affect the results ✓	1	3.2a	<b>ALLOW</b> so they didn't know which drink they had/which group they were in/could not tell the difference/it was a blind test <b>IGNORE</b> it was a fair test
	(iii)	<b>Any two from:</b> no hint of when line appears ✓  Person being tested by electronic timing/automated timing/can be done by one person ✓  Direct measurement of reaction time / No need to convert lengths into times ✓  Greater accuracy (of computer timer) ✓  reduced human error ✓  improved repeatability ✓	2	2 x 3.3b	<b>Assume answer relates to the computer unless specifically mentioned otherwise</b>  <b>ALLOW</b> computer is random  <b>ALLOW</b> Instant results <b>DO NOT ALLOW</b> quicker process  <b>ALLOW</b> less (chance of) mistakes

Question			Answer	Marks	AO element	Guidance										
5	(a)	(i)	PET waste would eventually sink in seawater ✓	1	3.2a											
		(ii)	Appropriate bar and axis labels, including % or the word 'percentage', and linear scale ✓  Correctly plotted bars ✓	2	2 x 2.2	<p><b>IGNORE</b> width/shading/touching bars <b>DO NOT ALLOW</b> larger pieces used to label two bars</p> <table border="1"> <thead> <tr> <th>Type of plastic litter</th> <th>Amount (%)</th> </tr> </thead> <tbody> <tr> <td>Beads</td> <td>3</td> </tr> <tr> <td>Fibres</td> <td>57</td> </tr> <tr> <td>Fragments</td> <td>34</td> </tr> <tr> <td>Larger pieces</td> <td>5</td> </tr> </tbody> </table>	Type of plastic litter	Amount (%)	Beads	3	Fibres	57	Fragments	34	Larger pieces	5
Type of plastic litter	Amount (%)															
Beads	3															
Fibres	57															
Fragments	34															
Larger pieces	5															
		(iii)	The proportions of acrylic and polyurethane are approximately the same ✓  The proportion of polypropene is approximately double that of acrylic. ✓	2	3.2b											
	(b)		<p><b>Any four from:</b> Sort /separate types of plastics ✓  Wash/clean ✓  Dried ✓  Grind/ flake ✓  Make into new products/materials ✓  Depolymerised / converted to monomers ✓  Re-polymerise the pure monomer/ new PET synthesised ✓</p>	4	4 x 1.1	<p><b>IGNORE</b> melting <b>IGNORE</b> crushed <b>IGNORE</b> reused</p>										

Question		Answer	Marks	AO element	Guidance
	(c) (i)	<p><b>Any two from:</b>            Answers related to reducing (energy) costs ✓            Breakdown products used to produce more PET ✓            PET to landfill/waste reduced ✓            Simpler (recycling) process ✓            Less litter ✓</p>	2	2 x 2.1	<p><b>IGNORE</b> faster/sustainable/natural  <b>IGNORE</b> more recycling takes place</p>
	(ii)	BADC ✓✓	2	2 x 2.1	<b>ALLOW</b> B anywhere before C for one mark

Question		Answer	Marks	AO element	Guidance
6	(a)	<p><b>FIRST CHECK ANSWER ON ANSWER LINE</b></p> <p><b>If answer = 29000 award 2 marks</b></p> <p><math>145000 \times 0.20 / 145000 \div 5 \checkmark</math></p> <p><math>= 29000 \checkmark</math></p>	2	2 x 2.2	<p><b>ALLOW</b> 145 000 x 1.2 <b>OR</b> 174 000 <math>\checkmark</math></p> <p><b>ALLOW</b> 29000 seen in working but not final answer for maximum 1 mark</p>
	(b)	<p><b>Any one from:</b></p> <p>Risk (of developing Parkinson's disease) is lower in (former) smokers / is higher in non-smokers <math>\checkmark</math></p> <p>Risk (of developing Parkinson's disease) is <b>lowest</b> in current smokers <math>\checkmark</math></p> <p><b>Any one from:</b></p> <p>(Approximately) 41% of patients are former smokers <math>\checkmark</math></p> <p>(Approximately) 8% are current smokers <math>\checkmark</math></p> <p>(Approximately) 50% of the patients have never smoked <math>\checkmark</math></p>	2	3.1a  3.1b	
	(c) (i)	<p><b>Any two from:</b></p> <p>increase in speed / (kinetic) energy <math>\checkmark</math></p> <p>(Particles) move apart <math>\checkmark</math></p> <p>changes (from a liquid) to a gas / vapour <math>\checkmark</math></p>	2	2 x 2.1	<p><b>ALLOW</b> idea of vibrate or move around <b>more</b></p> <p><b>ALLOW</b> overcome weak intermolecular forces</p> <p><b>ALLOW</b> evaporates / boils</p>

Question		Answer	Marks	AO element	Guidance
	(ii)	Comparison of e-cigarette is a physical change and cigarette is a chemical change ✓	1	2.1	<b>ALLOW</b> new products formed (including gases/carcinogens) in cigarettes
(d)	(i)	Ali ✓	1	3.1b	
	(ii)	Sarah ✓	1	3.1b	
(e)*		<p><i>Please refer to the marking instructions on page 5 of this mark scheme for guidance on how to mark this question.</i></p> <p><b>Level 3 (5–6 marks)</b> Analyses data to form reasoned conclusions about the relative risk and presence or lack of correlation.</p> <p><i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i></p> <p><b>Level 2 (3–4 marks)</b> Analyses some data to form conclusions about the risk and presence or lack of correlation.</p> <p><i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i></p> <p><b>Level 1 (1–2 marks)</b> Identifies foods from the data that change the risk of Parkinson’s disease.</p> <p><i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i></p> <p><b>0 marks</b> <i>No response or no response worthy of credit.</i></p>	6	3 × 3.1a 3 × 3.2b	<p><b>AO3.1a Analyse data</b> For example:</p> <ul style="list-style-type: none"> <li>reduction of risk linked with eating all foods except tomato juice</li> <li>peppers - 0.24 reduced risk (conc. 102)</li> <li>tomatoes – 0.58 reduced risk (conc. 44)</li> <li>potatoes – 0.92 reduced risk (conc. 19)</li> <li>tomato juice – 2.16 increases risk (conc. 30)</li> </ul> <p><b>AO3.2b Analyse information to make conclusions/correlations</b></p> <ul style="list-style-type: none"> <li>Idea that results from tomato juice suggest that other factors may be involved.</li> <li>correlations imply that nicotine-containing foods give protection against Parkinson’s disease</li> <li>Portion may alter risk</li> <li>Comparative statements about risk</li> <li>Correlation ideas limited by small sample size</li> <li>other factors may be involved in patients who ate nicotine-containing foods</li> </ul>
