

F

Friday 06 November 2020 – Morning

GCSE (9–1) Combined Science (Biology) A (Gateway Science)

J250/01 Paper 1 (Foundation Tier)

Time allowed: 1 hour 10 minutes

8170581227

| You | must | have: |
|-----|------|-------|
|-----|------|-------|

• a ruler (cm/mm)

You can use:

- · a scientific or graphical calculator
- an HB pencil

| Please write clearly in | olack ink. Do not wri | ite in the barcodes. | | |
|-------------------------|------------------------------|----------------------|--|--|
| Centre number | | Candidate number | | |
| First name(s) | | | | |
| Last name | | | | |

INSTRUCTIONS

- Use black ink. You can use an HB pencil, but only for graphs and diagrams.
- Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.
- Answer all the guestions.
- Where appropriate, your answer should be supported with working. Marks might be given for using a correct method, even if your answer is wrong.

INFORMATION

- The total mark for this paper is 60.
- The marks for each question are shown in brackets [].
- Quality of extended response will be assessed in questions marked with an asterisk (*).
- This document has 24 pages.

ADVICE

· Read each question carefully before you start your answer.

SECTION A

Answer **all** the questions.

You should spend a maximum of 20 minutes on this section.

Write your answer to each question in the box provided.

| The n | nagnification of the obje | ctive lens is ×20. | |
|--------|---|---|-------------------------|
| Calcu | ulate the magnification o | f the image they see. | |
| A × | ×10 | | |
| В × | ×20 | | |
| C × | ×100 | | |
| | | | |
| Your a | ×200 answer at the table. | | |
| Your a | answer | Movement down a concentration gradient | Substance(s) moved |
| Your a | answer at the table. | | |
| Your a | answer at the table. Requires energy | concentration gradient | moved |
| Your a | answer at the table. Requires energy yes | concentration gradient | moved water and glucose |

| 3 | | rs are formed when skin is damaged. Which word describes the type of cell division uen scar tissue forms? | sed |
|---|------|---|-----|
| | Α | Differentiation | |
| | В | Mitosis | |
| | С | Replication | |
| | D | Specialised | |
| | You | r answer | [1] |
| 4 | A pe | erson needs to have injections every day because they have type 1 diabetes. | |
| | Whi | ch substance do these injections contain? | |
| | Α | Glucose | |
| | В | Haemoglobin | |
| | С | Insulin | |
| | D | Testosterone | |
| | You | r answer | [1] |

5 The diagram shows cells from a plant.

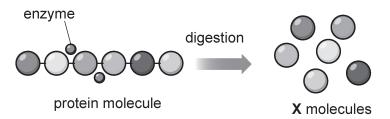

Where in the plant would these cells be found?

- A Leaf
- **B** Flower
- **C** Root
- **D** Stem

Your answer [1]

6 The diagram represents the digestion of protein by an enzyme.

What name describes the **X** molecules?

- A Amino acids
- **B** Fatty acids
- **C** Glucose
- **D** Glycerol

Your answer [1]

| 7 | Wh | ich substances are transported in the xylem vessels? | |
|--------------------------|-----|---|-----|
| | Α | Mineral ions only | |
| | В | Sucrose only | |
| C Water and mineral ions | | | |
| | D | Water and sucrose | |
| | You | ır answer | [1] |
| 8 | Wh | ich chamber of the heart receives blood directly from the pulmonary vein? | |
| | Α | Left atrium | |
| | В | Left ventricle | |
| | С | Right atrium | |
| | D | Right ventricle | |
| Your answer | | | |

9 Table 9.1 shows the classification of non-diabetic, pre-diabetic and type 2 diabetes based on blood glucose levels.

| Classification | Blood glucose levels 2 hours after food (mg/d <i>1</i> of blood) | Blood glucose levels 12 hours after food (mg/d <i>l</i> of blood) |
|-----------------|--|---|
| non-diabetic | 70–99 | <140 |
| pre-diabetic | 100–125 | 140–199 |
| type 2 diabetes | >126 | >200 |

Table 9.1

Table 9.2 shows measurements of blood glucose levels taken from 4 people.

| | Blood glucose levels 2 hours after food (mg/d <i>1</i> of blood) | Blood glucose levels 12 hours after food (mg/d <i>1</i> of blood) |
|---|--|---|
| Α | 73 | 140 |
| В | 100 | 125 |
| С | 105 | 148 |
| D | 129 | 206 |

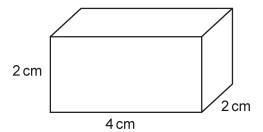

Table 9.2

Which row in **Table 9.2** shows a person who is a **pre-diabetic**?

| Your answer | [1] |
|-------------|-----|

10 A student investigates the rate of diffusion using blocks of agar.

The diagram shows one of the blocks of agar they use.

The block has a surface area of $40\,\mathrm{cm}^2$.

What is the surface area to volume ratio of this block of agar?

- **A** 1:2
- **B** 1:2.5
- **C** 2:1
- **D** 2.5:1

Your answer [1]

SECTION B

Answer all the questions.

11 (a) Fig. 11.1 shows a red blood cell.

Fig. 11.1

Complete these sentences about this red blood cell.

Choose words from the list.

You may use each word once, more than once or not at all.

(b) Fig. 11.2 shows two different blood vessels, X and Y, from the human body.

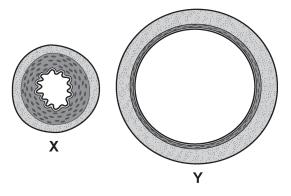

Fig. 11.2

Which blood vessel, **X** or **Y**, is an **artery**?

Write down **two** pieces of evidence seen in **Fig. 11.2** to support your answer.

2

[2]

(c) Fig. 11.3 shows the structure of a human heart.

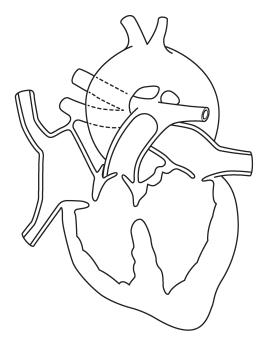

Fig. 11.3

The heart has a defect.

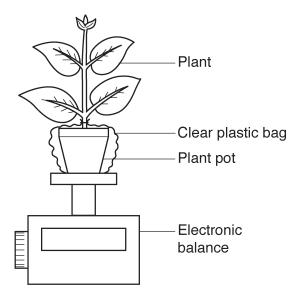

| (i) | Draw the letter X on the diagram to show the position of the defect. | [1] |
|-----|---|-----|
| ii) | Explain how this defect might affect the transport of oxygen around the body. | |
| | | |
| | | |
| | | |
| | | |
| | | [2] |

12 A student investigates transpiration rate in six plants.

The plants are the same size, age and type.

The student adds the same volume of water to the soil in the plant pots and covers each pot with a clear plastic bag. They then measure the mass of each plant.

The diagram shows the apparatus they use.

Three plants are placed in the light and three in the dark. After 24 hours the student measures the mass again.

| (a) | Write down two variables that were controlled in the investigation. | |
|-----|--|-----|
| | 1 | |
| | 2 | |
| | | [2] |
| (b) | What should the student do to reduce the effect of random errors? | |
| | | |
| | | [1] |

(c) The table shows the results of the student's investigation.

| Plant | Light or dark | Mass at start (g) | Mass after 24 hours (g) | Change in mass (g) |
|-------|------------------|-------------------------|-------------------------------|--------------------------|
| Α | light | 148 | 124 | 24 |
| В | light | 146 | 114 | 32 |
| С | light | 147 | 111 | 36 |
| D | dark | 150 | 139 | 11 |
| E | dark | 147 | 135 | 12 |
| F | dark | 149 | 138 | 11 |

| | (i) | Which set of results are more precise , light or dark? |
|-----|-------|--|
| | | Explain your answer. |
| | | |
| | | [1] |
| | (ii) | The mean change in mass for plants in the dark is 11.3 g. |
| | | Calculate the mean change in mass for the plants in the light (plants A to C). |
| | | Give your answer to 1 decimal place. |
| | | |
| | | |
| | | Mean change in mass for light = g [3] |
| | (iii) | Write down one conclusion about the effect light has on the transpiration rate seen in the table. |
| | | |
| | | [1] |
| (d) | The | student has investigated the effect of light on transpiration rate. |
| | | student decides to develop their investigation to find the effect of air movement on spiration rate. |
| | Sug | gest one piece of apparatus they could use to change the movement of the air. |
| | | |
| | | [1] |
| | | |

13 (a) Fig. 13.1 shows a single-celled organism called an alga.

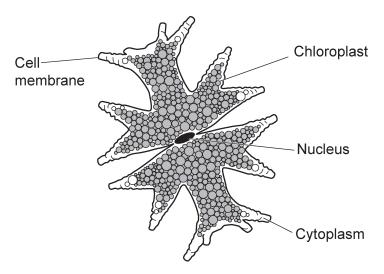

Fig. 13.1

| | _ | |
|------|--|-------|
| (i) | The cell in Fig. 13.1 is a eukaryotic cell. | |
| | Use the diagram in Fig. 13.1 to explain why the cell is a eukaryotic cell. | |
| | | |
| | | . [2] |
| (ii) | Chlorophyll is used in photosynthesis. | |
| | What are the two raw materials needed for photosynthesis? | |
| | 1 | |
| | 2 | |
| | | [2] |

(b) Fig. 13.2 shows algae growing on the surface of a lake.

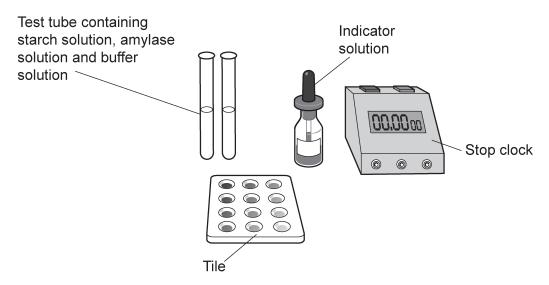

Fig. 13.2

| In summer the area covered by algae increases. |
|---|
| Explain why more algae grow in the summer than in the winter. |
| |
| |
| |
| |
| |
| [3] |
| |

14 A student investigates the effect of pH on the activity of the enzyme amylase on starch.

To change the pH of the amylase, the student uses a chemical called a buffer.

The diagram shows equipment used in their investigation.

This is the method the student uses:

- 1. Add a single drop of indicator solution to each compartment in the tile.
- 2. Use **one** syringe to add 2 cm³ amylase solution, 1 cm³ pH3 buffer solution and 2 cm³ starch solution to the test tube.
- 3. Start the stop clock.
- 4. Every **20 seconds** transfer a drop of the mixture in the test tube to the indicator in the tile and record the colour change of the indicator.
- 5. Stop the stop clock when the indicator in the tile stays orange.
- 6. Repeat the method using buffers of **different** pH.

| (a) | Identify the independent and dependent variable in this investigation. |
|-----|--|
| | Independent variable |
| | |
| | |
| | Dependent variable |
| | |
| | |

[2]

| (b) | (b) The indicator solution changes colour when s | arch is present. | | | | | | |
|-----|--|---|--|--|--|--|--|--|
| | (i) What is the name of this indicator solutio | ገ? | | | | | | |
| | (ii) What colour will the indicator solution cha | ange to when starch is present? | | | | | | |
| (c) | (c) To improve their investigation the student cou | d repeat each pH to identify anomalies. | | | | | | |
| | Suggest two other improvements the student | could make to their investigation. | | | | | | |
| | For each improvement write down one reason | n why it is needed. | | | | | | |
| | Improvement 1 | Improvement 1 | | | | | | |
| | Reason | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | Improvement 2 | | | | | | | |
| | Reason | | | | | | | |
| | | | | | | | | |
| | | [4] | | | | | | |

 $(d)^*$ The table shows the student's results.

| pH of buffer solution | Time when indicator stays orange (seconds) |
|-----------------------|--|
| 3 | Indicator still changes colour after 600 |
| 5 | 360 |
| 7 | 60 |
| 9 | 340 |
| 11 | Indicator still changes colour after 600 |

| Explain the pattern in the results. |
|--|
| Include ideas about the mechanism of enzymes in your answer. |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| 31 |

17 BLANK PAGE

PLEASE DO NOT WRITE ON THIS PAGE

Turn over for the next question

- 15 Stem cells are found in both animals and plants.
 - (a) (i) Fig. 15.1 shows the area where stem cells can be found in a plant.

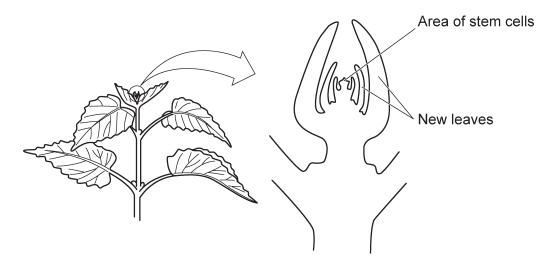

Fig. 15.1

| | What is the name of the area where stem cells are found? | |
|------|--|-------|
| | | [1] |
| (ii) | Describe the difference between embryonic and adult stem cells in animals. | |
| | | |
| | | . [1] |

(b) A group of people were asked if they were in favour of using embryonic stem cells for medical research.

The pie chart in Fig. 15.2 shows the results.

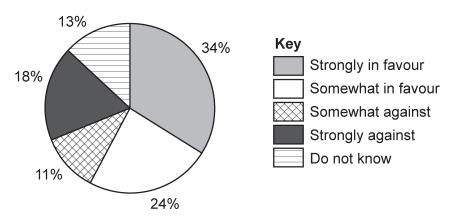

Fig. 15.2

(i) There were 254 people in the survey.

Calculate the **total** number of people who were **against** the use of embryonic stem cells.

Give your answer to the **nearest whole number**.

| | Number of people against =[3] |
|------|---|
| (ii) | Suggest two reasons why some people may object to the use of embryonic stem cells. |
| | 1 |
| | |
| | 2 |
| | |
| | [2] |

| | | | | 20 | | | | |
